

Offshore

At Angle Ring, we are a global supplier of a wide range of metal bending products into the Offshore sector, with our induction bending capabilities allowing us to offer bends, including clad bends, from 2" to 36" NB in a variety of materials.

Our heavy rolling and press braking capabilities enable us to offer cylinders and pipes of up to 10m in length, and up to 200mm in thickness.

All our products are available in a wide range of materials from carbon steels and stainless steels to nickel alloys, duplex, aluminium, and titanium.

Our capabilities are well suited for rolled and welded cylinders and pipes, which can be used on a wide range of applications in the marine and offshore sectors. For added value, our extensive fabrication facilities mean we can offer fully coded welding procedures and independent testing services.

As we work to the exacting specifications demanded by the industry, this enables us to offer a high quality, dedicated service to both end users and sub suppliers.

We can bend:

- Cylinders
- Pipes
- Pig Launchers
- Receivers
- Vessels
- Tubular Piles
- Winch Drums
- Process Pipework
- Motor Casings

Projects we have worked on:

- Oil & Gas
- Marine
- Renewables
